

UltraBiotic Bifidus

Bifidobacterium lactis

UltraBiotic Bifidus Supplementation

UltraBiotic Bifidus is a probiotic supplement manufactured with 15 billion viable cells of cultured, pure *Bifidobacterium lactis*. Better yet, UltraBiotic Bifidus is dairy-free, gluten-free, non-GMO, and vegetarian.

B. lactis aids in the digestion of lactose and is critical for creating B vitamins, which serve a multitude of vital roles throughout the body.¹ This particular probiotic can also support immune function and digestion of various types of sugars and fibers.^{2,3,4}

UltraBiotic Bifidus is made with one of the most studied bacterial strains and may benefit users in a variety of ways. These benefits typically include:

- Supports a healthy gut microbiome[†]
- Supports lactose digestion[†]
- Supports immune function[†]
- Supports macronutrient absorption[†]
- Supports B vitamin synthesis[†]
- Manufactured with 15 billion viable cells of cultured, pure *Bifidobacterium lactis*

How UltraBiotic Bifidus Works

B. lactis is a lactic acid bacteria that naturally grows in the small intestine and is highly resistant to stomach acid.⁵ *B. lactis* colonizes the gut and is specifically known for its resistance to bile salts, which is important since bacteria typically need to get past some very harsh digestion.⁶

Even though there are over a dozen probiotic strains, *B. lactis* is one of the most versatile and hardest working for the human body.[†] Similarly to other strains, this lactic acid bacteria can help support lactose intolerance and support your immune system.[†]

How UltraBiotic Bifidus Works Continued

Many children and adults develop intolerance for milk sugar (lactose). This intolerance can lead to gastrointestinal distress due to lactose malabsorption. Research demonstrates that *B. lactis* may support proper lactose digestion in susceptible individuals by releasing lactase (the enzyme responsible for breaking down lactose).^{♦7}

In addition to these benefits, *B. lactis* may also support colon health and even digestion of common food allergens like wheat/gluten.^{♦8,9}

Supplement Facts

Serving Size: 1/2 Teaspoon (1.5 g)

Servings Per Container: About 50

	Amount Per Serving	%DV*
Calories	5	
Total Carbohydrate	1 g	<1%*
<i>Bifidobacterium lactis</i> UABla-12™†	15 billion live organisms††	**

Other Ingredients: Organic rice syrup solids.

† This trademark is the property of UAS Labs.

†† At time of manufacture.

Directions: Mix 1/4 to 1/2 teaspoon with eight ounces of un-chilled water one to two times daily as a dietary supplement or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.
